

Tips for Posting to a Blog

1. Make your opinion known

People like blogs because they are written by people and not corporations. Tell them exactly what you think using the least amount of words possible.

2. Make sure your post is complete

Use complete sentences and write in paragraph form. We are blogging instead of writing a ton of papers. Therefore, your posts will be for a grade.

3. Include links to other source

Support your post with links to other web pages that are contextual to your post (if possible and appropriate).

4. Write a Draft

Avoid losing all of your work. Write your draft using Word or Google docs and save often. When you are finished, copy and paste your work into your Weebly site blog slot.

5. Edit your post

Good writing is in the editing. Before you hit the submit button, re-read your post and cut out the stuff that you don't need.

6. Make sure you **PUBLISH** your work

Hit the Publish button when you are finished with your work
